General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Compound Cut Puzzle Block

Notice that the middle tabs get cut away. This is normal.

The puzzle has 12 compound cut pieces.

This puzzle needs accurate 90 degree cuts or it will not slide apart easily. Use a sharp blade and let the blade do the cutting. Don't force the cut or you will end up with bowed or slanted cuts.

The finished puzzle is somewhat fragile. It will not hold up to rough handling. It is more of a novelty than a child toy.

Wrap the pattern around a 1.5" X 1.5" X 4.25" Block covered with blue painters tape.

I find it easier to use my compound cut jig to hold the block while I make the cuts.
You can find the pattern for the jig in my online catalog.

Cut side one then flip the piece to prepare to cut side two.

Remove the block from the jig and carefully disassemble the waste pieces from the block

You will eventually get down to the puzzle. Some of the cut away center tabs will still be in the puzzle at this point. They will fall out as you disassemble the puzzle.

These pieces will fall out as you take the blok apart. This is normal.

These small tabs will need to be sanded away to make the puzzle easier to slid apart.

1.5" X 1.5" X 4.25"
