### Suggestions:

- Use wood thickness of choice – hardwood, plywood or MDF
- Back the project with wood of a contrasting color OR
- Back the project with a plain or even-patterned fabric in a bright color. Craft glue or wood glue is used to attach fabric to wood. Cut the fabric to size, glue it behind the plaque and apply a heavy weight on top of the project to allow the glue to dry. Any excess fabric can be cut off later using a pair of small, sharp needlework scissors
- The project can also be painted with acrylics or spray paints

More Christmas bells and other Holiday patterns are available in the [Christmas](#) section of my website
