# General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

## Wood and Aluminum Pendant

The center medallion is cut from 1/16" thick aluminum

Source for the blades.  
[www.bearwood.com](http://www.bearwood.com)

After you cut the aluminum you need to remove the burrs and sharp edges. I use a mop sander but if you don't have one just use a high grit sand paper.

I am polishing the aluminum medallion with Mothers Mag & Aluminum polish.

A Dremel tool with a buffing wheel does the polishing.  
The wood is 1/8" thick.

Two 1/2" jump rings.

If the medallion does not center up after you install the jump ring then just cut the jump ring shorter until it does.

1/16" Thick Aluminum
