Rapid fire rubber band gun.

When you load the rubber bands start at the tooth closest to the rear grip.

As you assemble the trigger assembly make sure it slides smoothly front to back.

Grip guards

This would be a good place to customize the pattern. You could scroll the owners initials in the grip guards. I put a dragon on one of the grips to give you an idea of a way to decorate the gun.

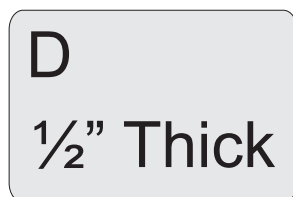

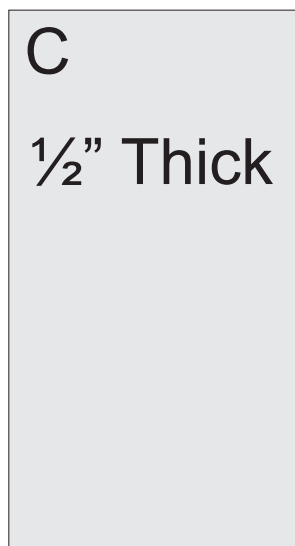

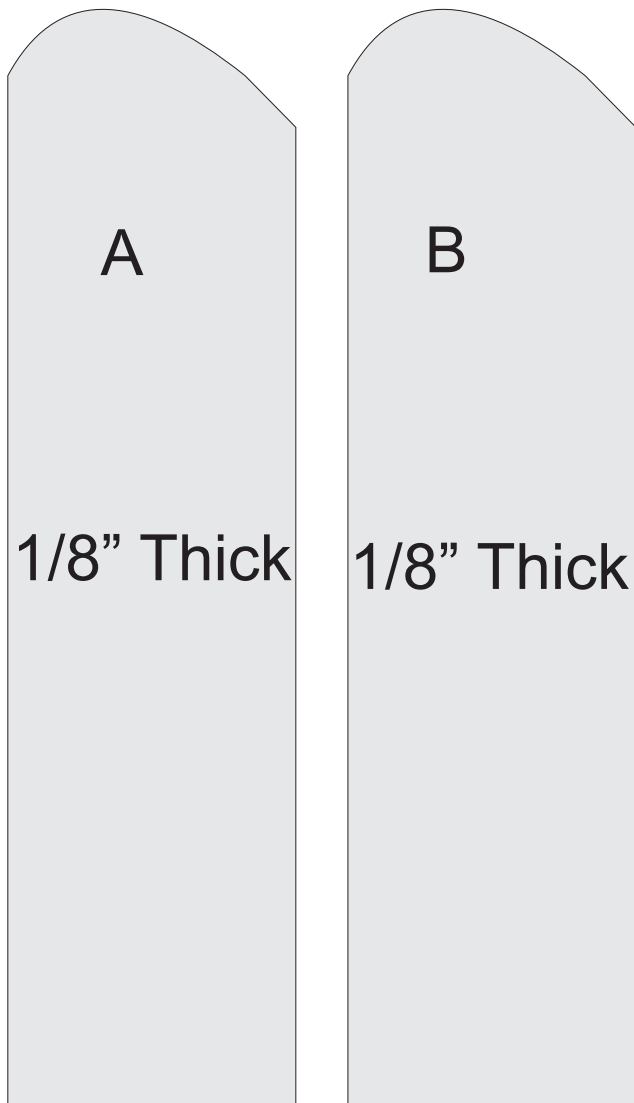

1/8" Thick

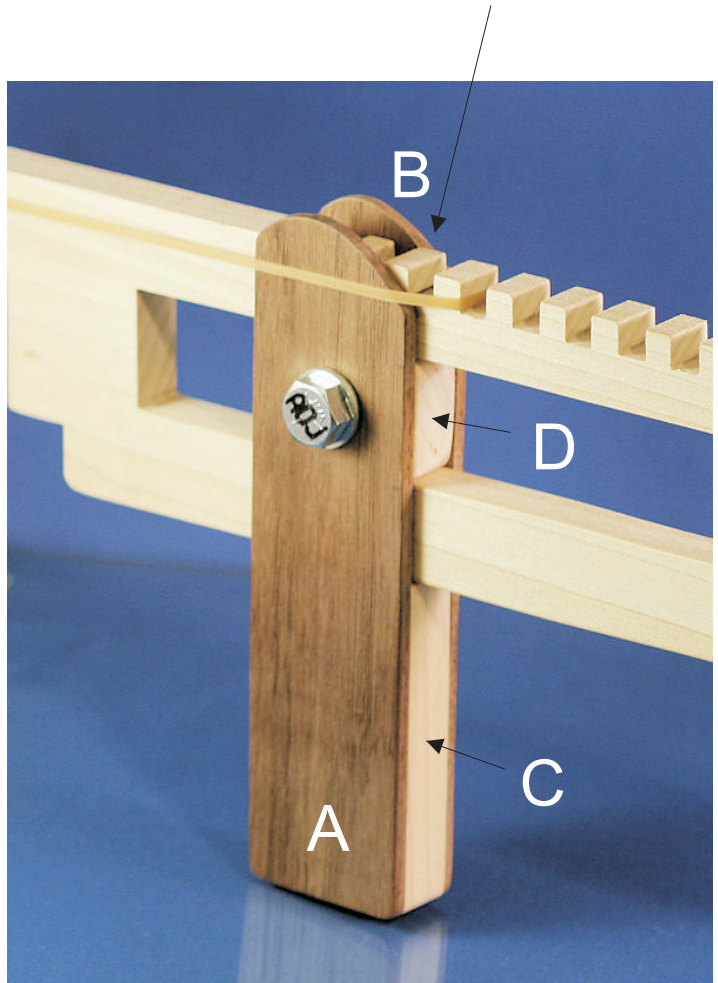

1/8" Thick

Trigger Mechanism

Sand the edges of the trigger ramp so they don't cut the bands.

Notice how the band is loaded on the outside of the trigger assembly.

When you have finished assembly use a file to adjust the trigger ramp if the bands don't fire smoothly.
