## General Pattern Information

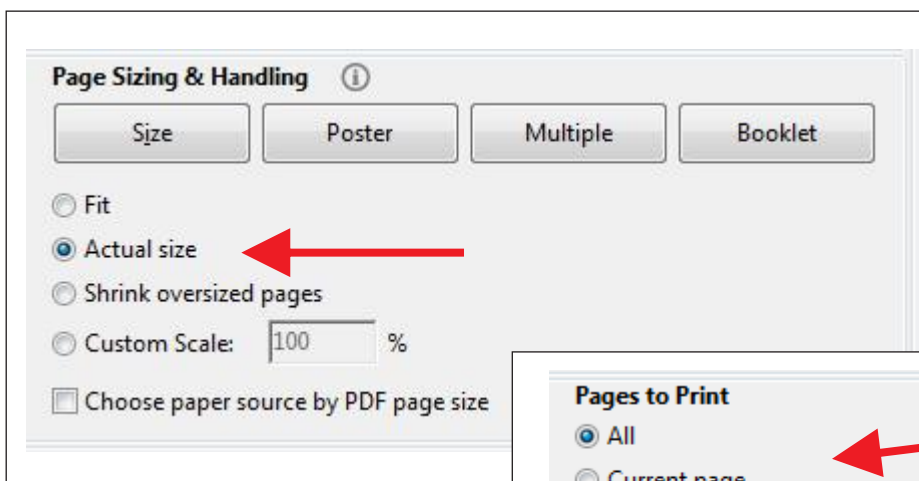

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

## Printing Instructions

I kept the unit small, holding only six cans. If you need more storage then make more than one unit. I plan to make more than one and hang them in different places in the shop. Spray finish by my spray box. Spray adhesive near my work bench etc...

The unit hangs from two screws.

Note that the cans sit on top of the can below. I did it this way to keep the unit as shallow as possible. If you want to use the bottom can you need to slightly lift the can above it.
