General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Magnetic Can/Bottle Holder

Mounted to my scroll saw stand

Steve

1/2" Diameter Neodymium Magnets

Steve

I used 1/2" thick and 1/8" thick Baltic birch plywood

I used a 1/2" forstner bit to inset the magnets. The magnets should be just above the surface.

Epoxy the three magnets in to their holes.

Glue the bottom to one ring.

Glue the 1/8" leg to the bottom ring in the slot.

Glue on the top ring.

After the epoxy cures glue the magnet leg to the rings.

With three of the 1/2" magnets
a large bottle is securely
supported.
