General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Pocket Comb

I used my laser engraver to add the graphics to the handle.

Clamp the body together and before the glue dries insert the 1/8" dowel through the body and comb. Use a small amount of glue at one end of the dowel to hold it in place.

Work the comb back and forth to make sure it is not glued in place.

I kept the teeth of the comb large to help prevent breaking. The comb works best if you sand the teeth to a blunt point.

When you place the pattern for the comb orient it so that the teeth do in the direction of the grain. This will help keep them stronger.

1/8" Thick
