General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Small patterns to practice cutting Corian.

I use 1/4" thick Corian. I buy mine from..

www.inventables.com

One 8" X 12" X 1/4" sheet costs a little under \$20 plus shipping. You can get quite a few small projects out of one sheet.

It is very important to use the correct blade when cutting plastic. If you use the wrong blade you will likely experience melting. The heat from the friction generated by the blade will fuse the cut line back together,

You want to use a Skip Tooth blade. I like the Pegas brand but any skip toothe blade will work.

The pattern is applied to the Corian using blue painters tap on the surface and spray adhesive on the back of the pattern.

Corian is durable but easily sanded. I use several methods to contour sand the edges. The finer the grit the smoother you can get the surface.

You can use CA glue to bond pieces of Corian together.
