Dragon Mirror

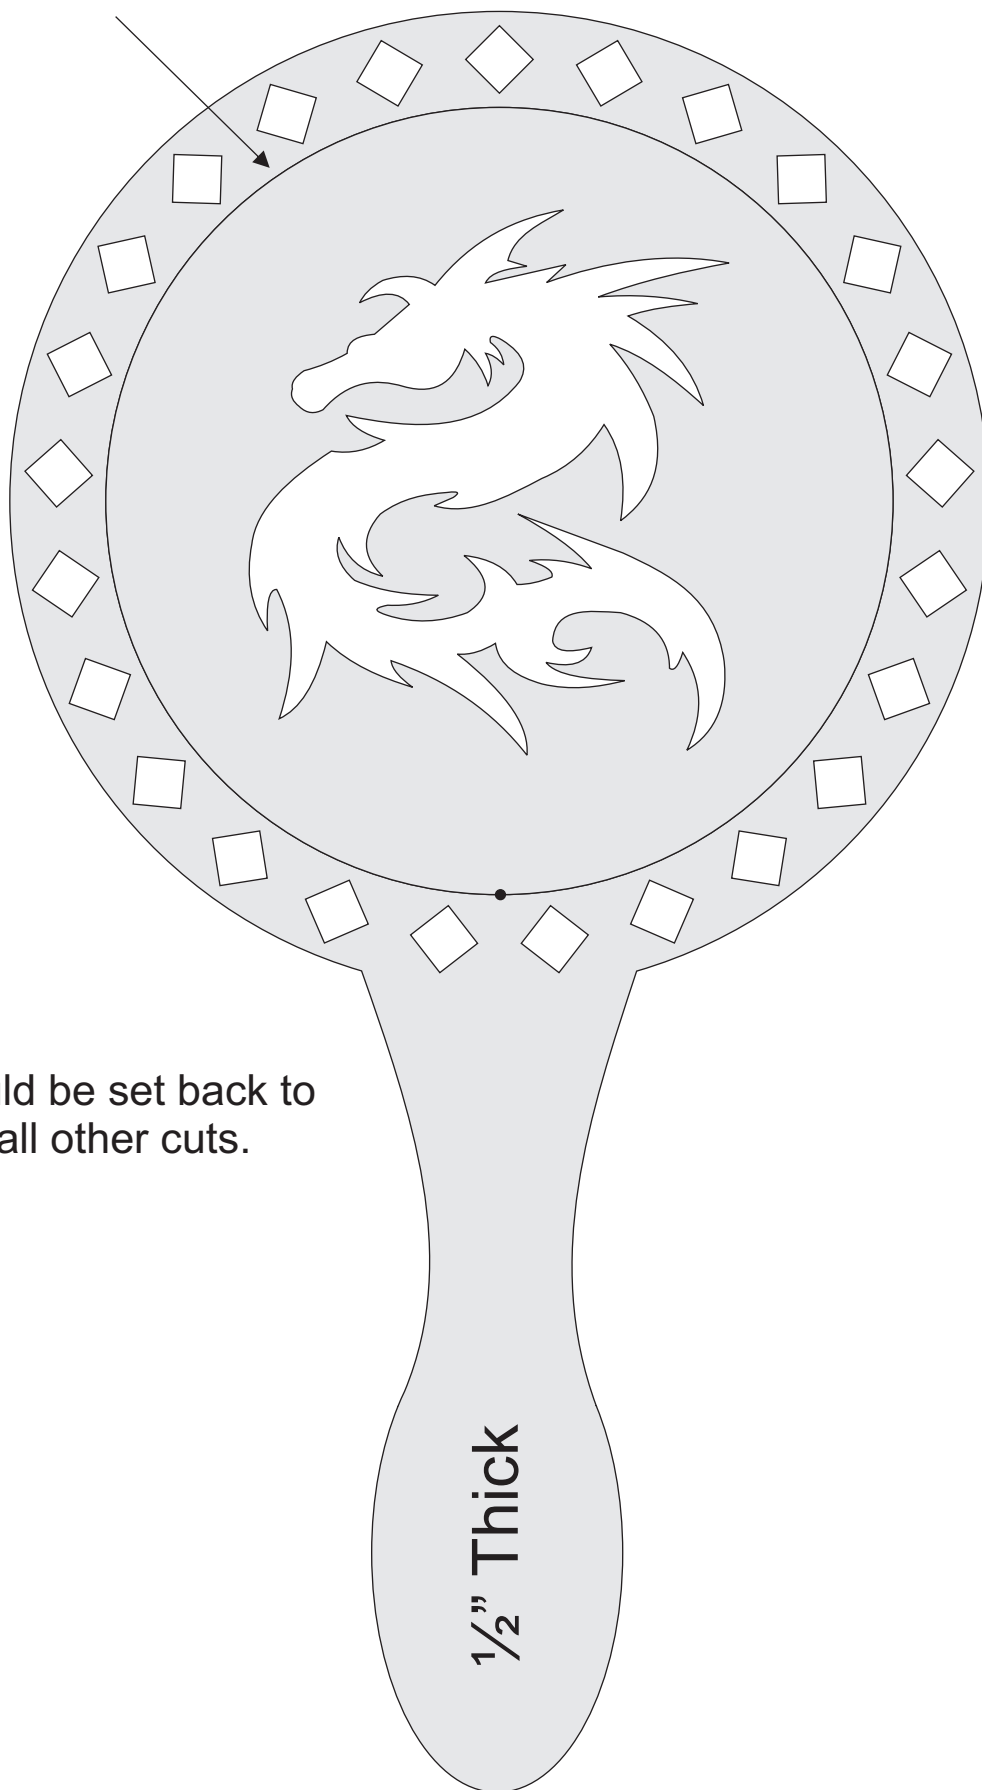

About a 1/8" reveal with bevel cut.

Inlay is FIMO polymer clay. The FIMO is pushed into the cut out and baked for 30 minutes at 265 degrees. It is then sanded flush and finished.

Bevel cut to get about 1/8" reveal.
Star out at about 4 degrees and
make test cut until you get the correct
reveal.

The blade should be set back to
90 degrees for all other cuts.
