General Pattern Information

Printing Instructions

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the "Page Sizing & Handling" section. Make sure the "Actual Size" is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the "Pages to Print" section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Easter Egg Box

The inner and outer walls are cut from one block of wood. This saves wood and guarantees a perfect fit. When you drill the starter hole for the cut that separates the walls use a small 1/16" drill bit. The hole will not be visible from the outside of the box but it's still best to hide it as much as possible

After you glue the bottom to the inner walls and the top to the outer walls, sand everything flush.

It has a better egg appearance if you round over the edges with a router. I rounded over the top and bottom.

1/4" Thick

At least 1" thick.
