## General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

## Printing Instructions

Fish Box

I used Baltic birch plywood for this box but any hard wood would work just as well.

To get the depth I wanted for the box I glued up two sheets of 1/2" thick BB ply for a one inch thick box.

1/4" Thick

It is best if you stack cut these parts so the fit is consistent.

I suggest at least a #5 blade for these parts. The #5 gives you enough separation between the walls to make the box easier to open.

The thickness of these pieces determine the depth of the box.  
I went with 1" thick
