General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Fuzzy Buster Sanding Brush.

After cutting with a scroll saw blade the back side of the board will have fuzzies. Using reverse tooth scroll saw blade helps but will not eliminate them completely.

They need to be sanded off. It can be difficult to get into the fretwork with flat sand paper. That is where the fuzzy Buster helps.

Epoxied nut

Wing bolt and washer

Two pieces of sand paper
glued back to back. Experiment
with the width of the cuts and
the length of the flaps.

You can cut the flaps at different widths. The thinner flaps are more gentle. The wider flaps work faster.

Clothed backed sand paper will last longer but any sand paper will work.

If you get the flaps too long they tend to tear quicker on paper backed sand paper.

1/4" Thick
