Small 3 inch round jewelry gift box.

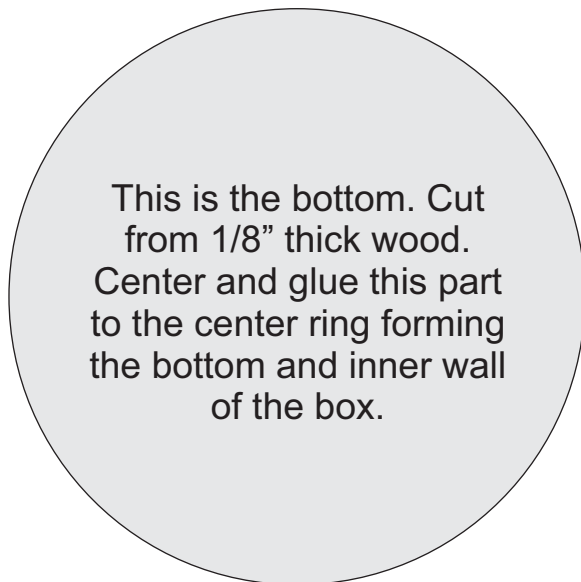

Felt glued under the top cutouts. Notice the space left for the inner walls.

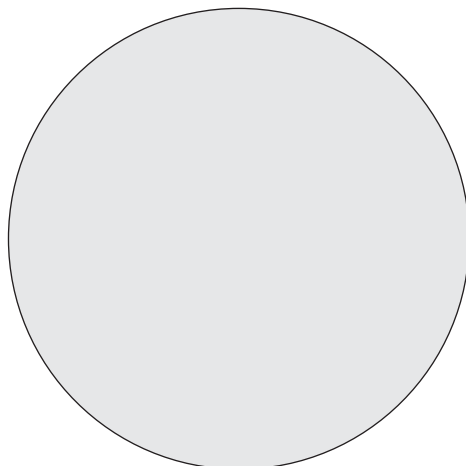

Inside and outside box walls. Cut from 1 inch thick wood. The black dot is the Drill point for the entry hole. Glue this part of the pattern to the blank. Cut out the center waste section. Then cut the center ring from the outer ring. Finally cut the outer ring from the blank. This will allow the box walls to fit smoothly together

Cut the top from 1/8" thick wood. Glue the top to the outer ring forming the top and outer wall of the box. Sand the top flush with the outer wall after it is glued up.

This is the bottom. Cut from 1/8" thick wood. Center and glue this part to the center ring forming the bottom and inner wall of the box.

These pattern parts are just for reference to cut the felt for the inside of the box. One piece of felt goes into the bottom. The other can be used to back up the top fretwork to show color through the cut outs.
