Ipuk

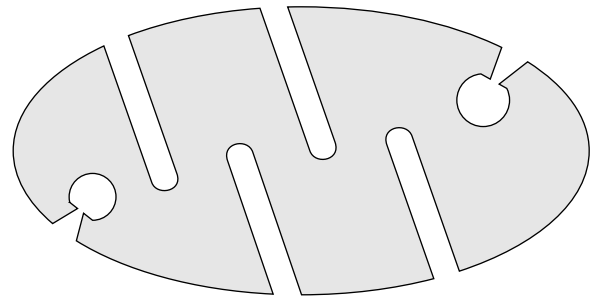

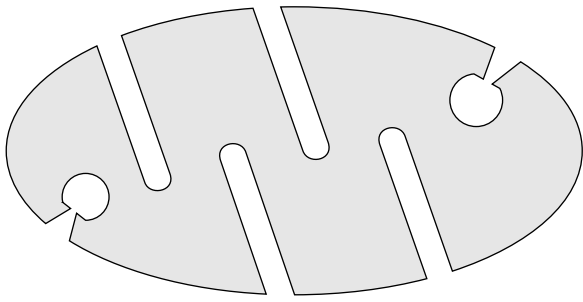

The Ipuk is a ear bud cable management system. These can be stack cut for maximum efficiency at the saw. People who own Ipods and Ipads love their accessories. Ear bud cables are always getting tangled and they are difficult to store. The Ipuk allows the user to wrap the cable and easily carry it in a pocket.

These should be cut out of 1/8" exotic or high quality hard woods. Anything thicker than 1/8" is too thick to be comfortable in the pocket. You also want the wood to match the high style of the Ipod.

This is a link to a video of the IPuk.
