General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the "Page Sizing & Handling" section. Make sure the "Actual Size" is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the "Pages to Print" section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Keyhole Slot Router Jig

Video Demonstration Link
<https://youtu.be/MKifpfJO-Ms>

This jig is to make it easy to cut keyhole slots in your projects for hanging on the wall.

Video Demonstration Link
<https://youtu.be/MKifpfJO-Ms>

This jig is designed for the Ridgid R2401 3.5" Base
<https://amzn.to/2lzyJPm>

You will also need a Keyhole Router bit.
<https://amzn.to/2N8StNd>

Small nails are driven just slightly through the jig to hold the project in place while the keyhole slot is cut. These nails can be driven in different locations depending on the shape of the project.

The jig is clamped to the workbench. The project is slid under the body of the jig and against the fence. The small nails lock the project in place to the slot can be routed.

You will also need two bolts 2 1/8"
Two flat washers
Two wing nuts for the bolts.

3/4" Thick

Designed for the Ridgid R2401 Trim Router
