General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Vinyl stickers cut on a scroll saw.

For best results you will also
need vinyl transfer tape.

For this project we will use Oracal 651
glossy vinyl. It is permanent outdoor
rated vinyl.

Amazon Link <http://amzn.to/2u2bPxO>

You will need two sheets of 1/8" thick Baltic birch plywood for the carrier.. Cut as many sheets of the vinyl as you wish to cut. You can stack can several at a time. I have cut up to 10.

Use blue painters tape to make a stacked sandwich of all the pieces.

Drill your holes for the interior cuts. I like to use a #2/0 reverse blade for a nice smooth cut.

Make your cuts then remove all the vinyl stickers.

Now we are going to apply our sticker to the vinyl transfer tape. Remove the backing paper from the transfer tape. Lay the tape down sticky side up.

Lay the vinyl sticker on the transfer tape face down. Use your finger to make sure the vinyl is stuck down well.

Gently remove the paper backing from the vinyl.

Prepare the object that will take the sticker by cleaning the surface and thoroughly drying.

Apply the transfer tape and vinyl to the object from the center out being careful not to get folds or large bubbles.

Use a credit card to rub the sticker for a good bond.

Gently remove the transfer tape. Go slow and push the vinyl back down if it starts to lift.

If you are very careful you can skip the transfer tape.
I don't recommend this method but with enough care
it will work.
