General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the "Page Sizing & Handling" section. Make sure the "Actual Size" is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the "Pages to Print" section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Mirror Backed Christmas Ornaments.

1/8" Thick

This project uses an Acrylic mirror.
This mirror cuts well on the scroll saw.

You can but it from Amazon at this link.

<https://amzn.to/31MopO6>

To make a clean cut on the mirror it needs to be stacked between two sheets of 1/8" Baltic birch plywood.

Cut the perimeter of the stack first. Then remove the mirror and complete the interior cuts of the ornament.

To cut the framed ornament you need to carefully cut the circles so the pieces fit together well.
Use super glue to glue the mirror to the frame.
Then you can glue the ornament cutout over the mirror.

The backer board is 1/8" Baltic birch plywood painted red and glued to the back of the mirror.

The ornament above is an example how you can cut the stencil out of the mirror for a different look. It is also an example of putting the pattern on the wrong side of the stack.

In the stack below the mirror should have been facing up.
