Mouse on Cheese

Notice how I notched between the ears. I did this by free-handing the cut on the scroll saw. After I cut the body out I put the nose on the table for support and cut the notch. You could also cut it with a carving knife or small grinding wheel. I also tapered the tail down to the tip by sanding it.

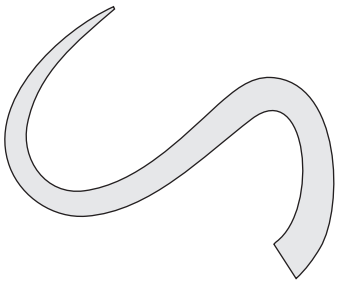
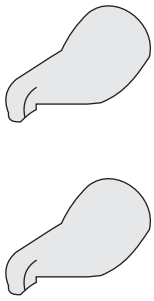
Tail

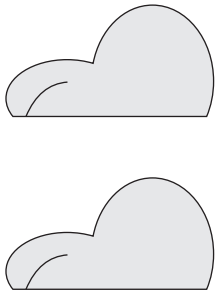


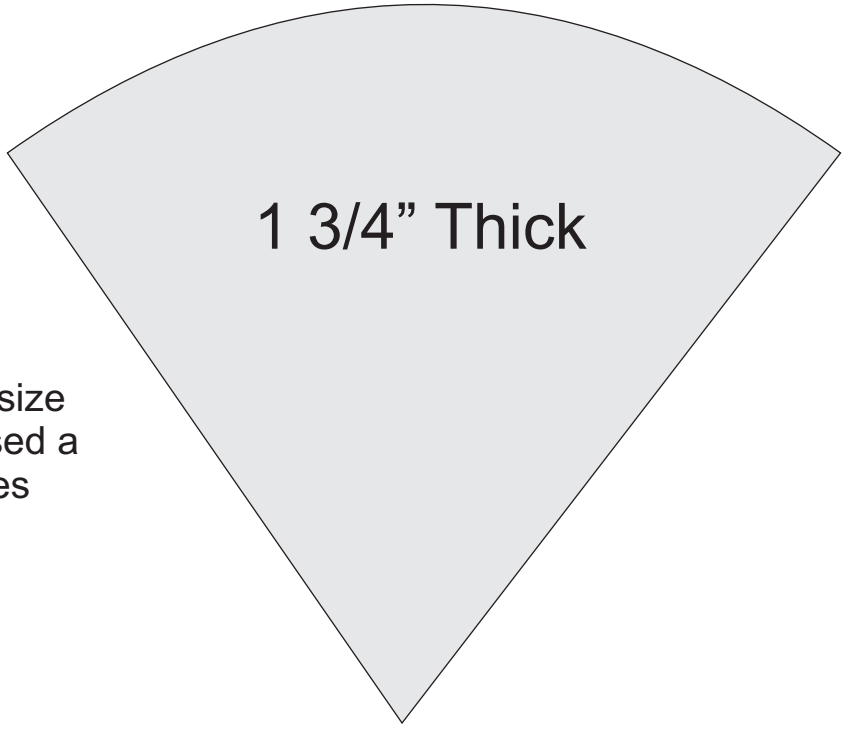
Front Legs



1/4” Thick

Rear Legs





After the cheese is cut use different size drill bits to add the cheese holes. I used a ½” bit and a 1/4” bit. I drilled 3 holes on each straight side.
