# General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

## Gold Jesus Cross

Cut from 1/4" thick MDF and sprayed painted metallic gold.

You will need to cut and splice the pattern together.

Drill the interior holes.

Because this is a larger pattern I made the exterior cut first. It allowed me to remove the waste making the board easier to handle.

After the cuts were complete I glued the cross to the backer board and clamped.

I added spacers to the back. The top spacer was added so I would have enough thickness to screw in the hanger. I added the other spaces just to make sure the cross hung evenly.

It also give is a bit of a shadow which I think looks nice.
