# General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Paper Butterfly Decorations.  
Perfect for wedding decorations or other events.

Cut several at a time.

This technique is called sandwich cutting. We will stack all the sheets of paper between two pieces of 1/8" Baltic birch plywood.

I use good quality construction paper. Cut as many sheets of paper as you want butterflies. All sheets are 6" X 3.5".

Cut the two sheets of bb ply the same size.

I have cut up to 20 at a time.

Cut the pattern to size and prepare to stack everything together.

Wrap the stack of plywood and sheets of paper with blue painters tape to hold them together.

Apply the pattern to the top of the stack.

Drill all the interior holes.

Cut all the interior cuts then cut the outside.

Remove the cut out.

Separate all the paper butterflies.

Fold along the fold lines and glue the body of the butterfly together.

Fold out the wings.

If you want the butterflies to stand we need to make basic legs. Cut a strip of paper two inches long and 1/4" wide.

Frold the strip in half.

Apply glue to each end and glue the folded strip to each side of the butterfly.

Cut off the strip leaving about 1/4" under the butterfly.  
Cut at a slight angle as shown.

Fold out the legs.

Now your butterfly will stand upright.
