General Pattern Information

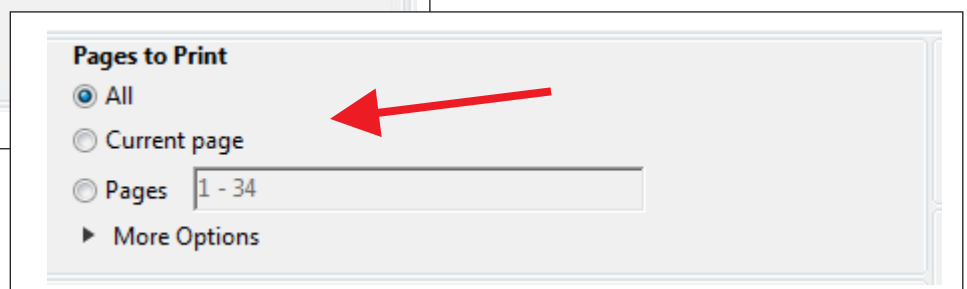

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Pour Over Coffee Stand

#2 Coffee Filter

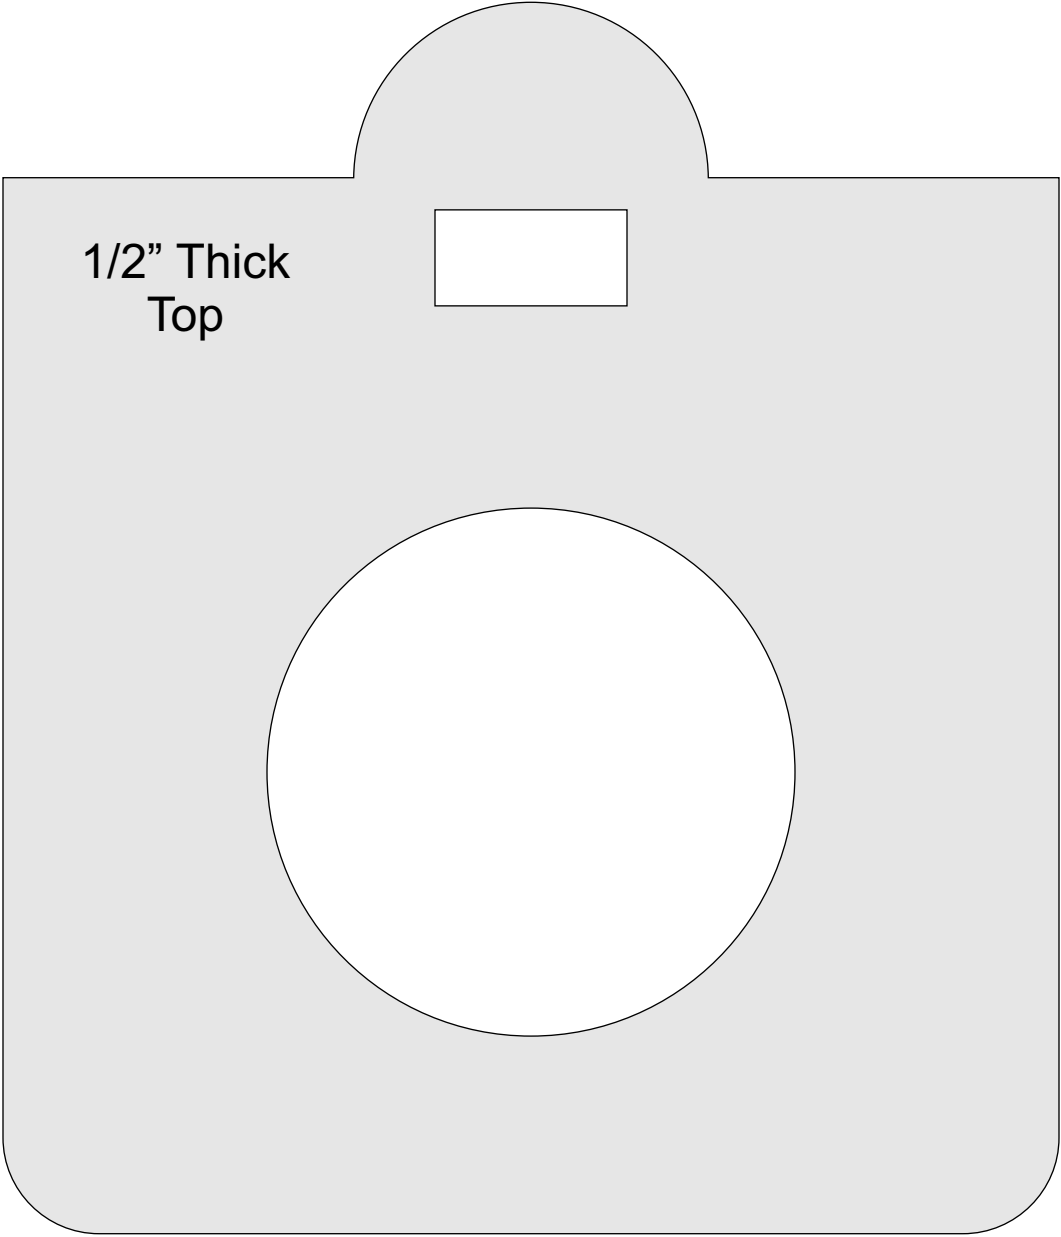

If you cut the joints tight enough you can skip the glue and make it a break down unit. If that is not desirable then glue it all together.

Do not glue on the funnel. You want to be able to remove and clean the funnel.

If you want to make the project easier then you can skip cutting the funnel and buy a five inch metal funnel. Here is an Amazon link for the funnel. The coffee filters do not fit quite as well though.

1/2" Thick
Top

1/2" Thick
Bottom

1/2" Thick
Center Post

The funnel is made using the concentric rind bowl technique.
We won't use the bottom of the bowl.

Tilt the blade to the angle shown (Red Line)
Cut counter Clockwise.

Cut and reverse stack the funnel. Glue the rings together
and sand everything flush to make the funnel.

Wood Funnel

Drill the entry holes at the same angle as the cut.

Story Stick for Drilling Holes
