## General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

## Printing Instructions

Round Box

There are eight side pieces. To speed up the project I stack cut four at a time.

This entire project is cut from 1/8" thick Baltic birch plywood. Material this thin can be difficult to cut. Because it's so thin the blade will want to drift. So the saw way down. Another trick is to cut more than one box at a time by stack cutting all the pieces. The thicker material will be easier to cut.

After I glued all the side pieces in to the bottom and top ring I used a heavy weight to clamp until the glue dried.

This is the bottom of the box showing the feet.

1/8" Thick Baltic birch plywood.

Feet

Lid

Side Walls. It will be easier to stack  
cut four at a time.
