## General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Round Woven Basket

The slats for the weave are not part of the pattern. Just cut several thin strips on your table saw or scroll saw that are  $\frac{3}{4}$ " wide and 6 inches long. Make them between  $\frac{1}{16}$ " and  $\frac{1}{8}$ " thick.

We will mark and cut them to length after the basket is assembled.

Use the slats to center up the rings while you glue the rings together.

Mark the length that the slats need to be and cut 12 of them. The slats do not need to be glued into the basket. Just push them into the opening of the basket.

Glueing on the top will keep the slats in place.

You can use different thicknesses  
of wood for the rings. More rings  
gives a better looking weave.  
Less rings goes faster.

Just try to keep the height of all  
the rings at 3 inches.

I have included six ring patterns.
