Note to commercial print employees: I give my permission to print as many of this pattern book as your customer requires.

## Scroll Saw Sculpture

To make these sculptures stand out I laminated contrasting wood.

I used maple and bubinga. The bubinga is cut into 3/8" strips. I then use the pattern to decide where I want the strip to intersect the maple. Notice the board on the right was cut at an angle.

Cut the maple where you want the strip. Glue the three pieces and clamp. After the glue cures sand or plane the panel smooth. Now you can apply the pattern and make the cuts on the scroll saw.
