General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

Scroll Saw Skull Box

The walls of the box are cut from a single 1" or thicker board.
Cut the center then cut the inner wall and finally cut
the outer wall.

Normally the edges of these boxes are sanded flush after they are glued together, Sanding the edges of this box will be difficult because of the irregular shape. You need to be accurate while cutting so the pieces fit as well as possible.

I am stack cutting the top and bottom of the box so they are identical.

This picture shows how the inner wall is glued to the bottom. The outer wall is glued to the top. The last step is to glue the skull to the top of the box.

Sand and finish and you are all done.

1/4" Thick
It's best to stack cut these
parts so they match.
