General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

There are patterns for different size smart phones.
Measure carefully and choose the correct parts.

Smart Phone Tilting Stand.

These patterns are the parts that hold the smart phone.
When you print it out you can use it as a guide to measure the phone for a good fit. Each slot is a different size. For some phones you may have to manually adjust the size.

Once you have the size picked out you can stack cut two of the chosen pattern to get the two upright pieces.

Spacer, item 5 has changes since the prototype was cut out. There is now a piece cut out of 5 to allow 6 more rotation.

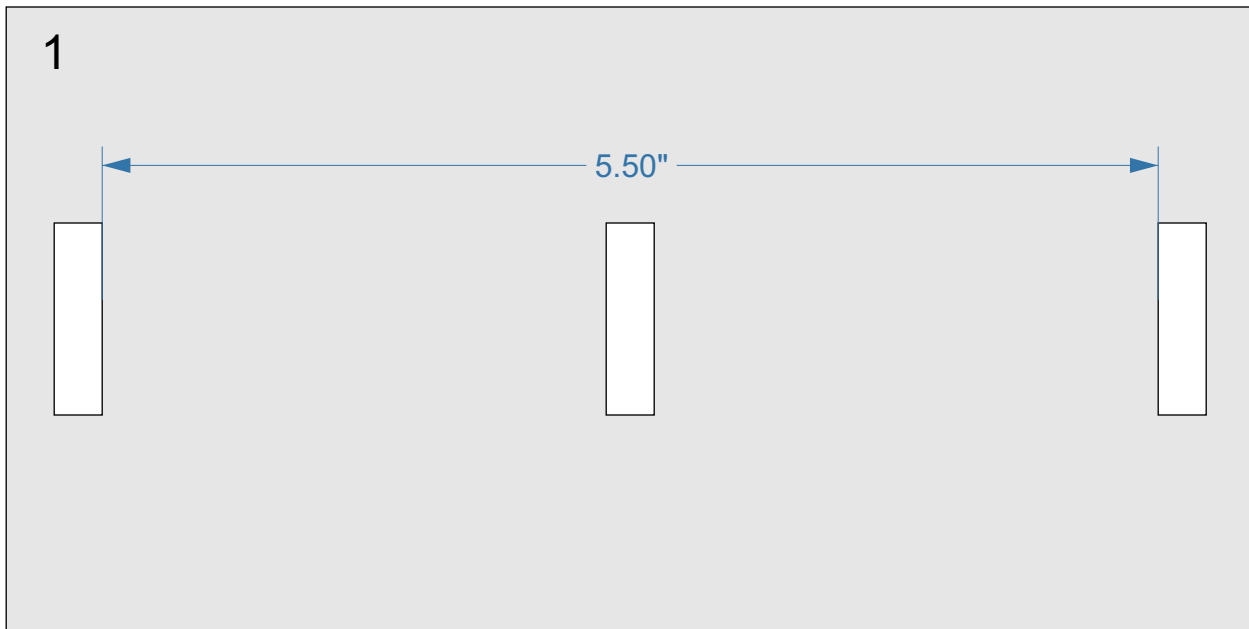

Drill the holes to fit the hardware you choose.

1/4" Thick
Choose the correct size
for your smartphone.
Cut two of the same size.
