

Tic-Tac-Toe

This is a simple pattern for a portable Tic-Tac-Toe game. It features a sliding lid to contain the pieces so the game can be brought anywhere.

The above image shows the order to cut the pieces. Cutting in this order keeps you from having to cut from a small piece of wood, as it keeps it so you are always cutting from the whole 5 1/2" square.

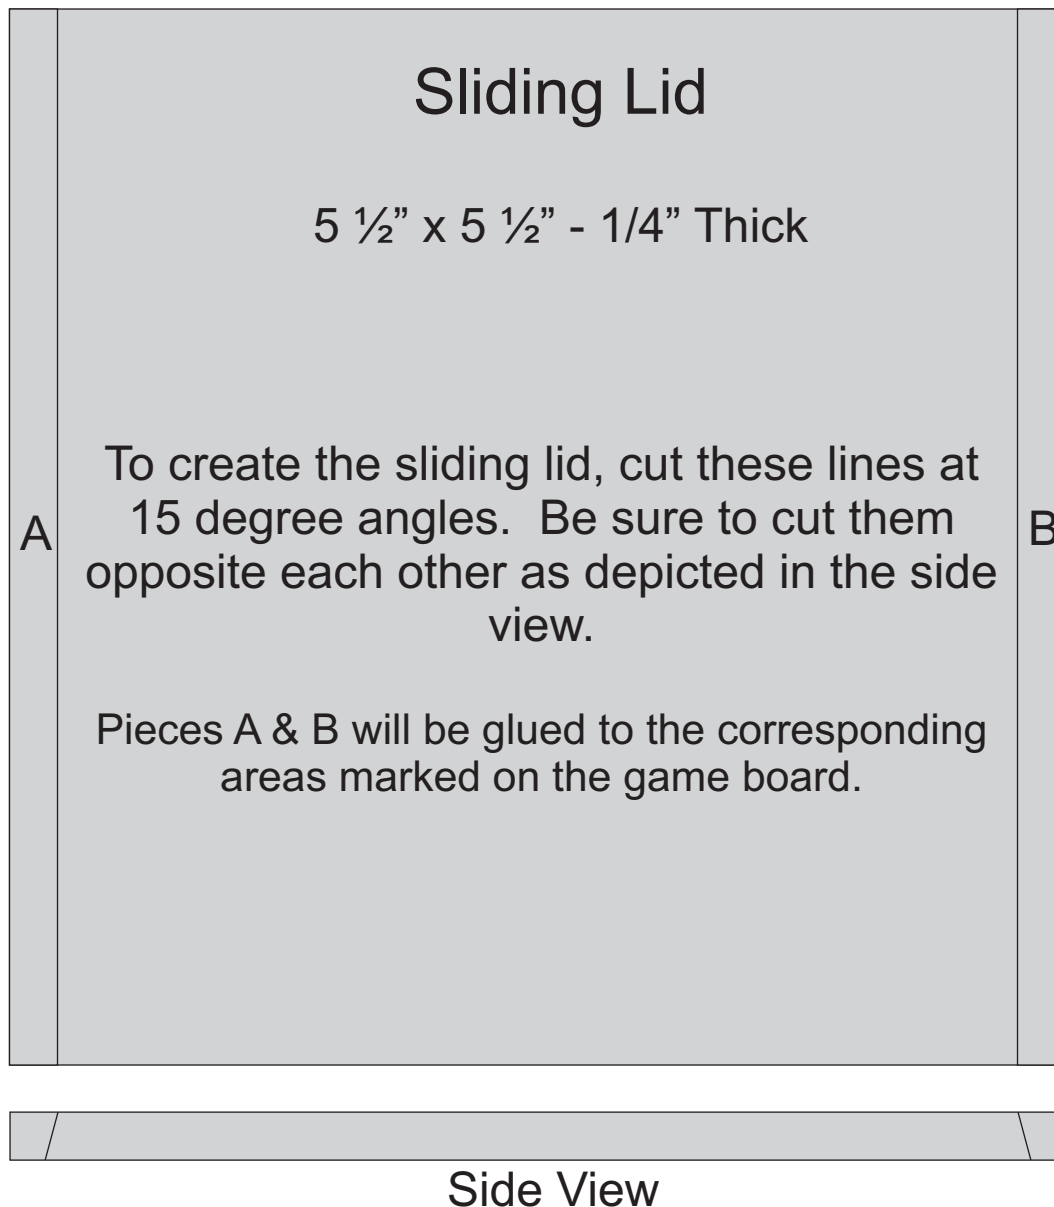

The below image shows proper alignment of the lid's edge as well as the side support.

1/4" Thick

Pieces are cut from the holes in the game board to reduce waste wood.

Base

5 1/2" x 5 1/2" - 1/4" Thick

Side support - 1/8" thick

Side support - 1/8" thick

Side supports will be glued to the sides of the completed game box. When gluing be sure to apply ample glue to the top edge, as the point of these supports is to help hold the lid's edges.
