## General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

## Printing Instructions

## Wooden Money/Card Clip

HERITAGEWOOD.COM !

Your source for scroll saw ready boards.  
[www.heritagewood.com](http://www.heritagewood.com)

You will need 1/8" thick hardwood or Baltic Birch Plywood.  
1" wide black elastic.

Scissors

Blue painters tape.

Thin super glue.

The pattern.

Cut the elastic to approximately 5 1/2" in length. You can experiment with different lengths for a looser/tighter fit.

I found black elastic with a nice pattern. I could not find other colors. Maybe at a fabric store you might be able to find some. They come in different widths. I used the 1" wide elastic.

I used thin super glue to make the loop. Other products may also work but experiment for best results. This super glue seems to work well.

I suppose a sewing machine would make the most durable connection but I have not tried that yet.

To keep the ends from fraying I applied a light coat of super glue to each end.

I applied a strip of super glue to one end of the elastic.

I rolled over the other end and held it in place for a few seconds.

I flipped the elastic inside out and sealed the ends with more super glue. I then rolled it inside out again and clamped each end. I let this set for several minutes.

After the glue dried I seemed to have a very strong bond.

Stack two of the 1/8" thick boards together with blue painters tape.

Apply the pattern with spray adhesive.

Drill one interior hole on the perimeter. Do not drill the other interior holes at this stage.

Cut the exterior of the blanks. After that cut is complete remove the back. Leave the pattern attached to the front.

Drill the rest of the interior holes and finish cutting.

Sand both halves and apply the finish of your choice.

Install the elastic band and you are ready to carry your new money/card clip.
