General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the "Page Sizing & Handling" section. Make sure the "Actual Size" is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the "Pages to Print" section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

14 piece lighted nativity project.
The figures are approximately 5.5 inches tall.
The palm tree stands over 9 inches tall.

Manger

SKU #1001255003

1 in. x 16 in. x 4 ft. S4S Laminated Spruce Panel Board

★★★★★ (1) Write a Review Questions & Answers (7)

\$12.82 /piece

Product Overview

A Laminated Softwood Board that is great for shelving and for building furniture. It is of higher quality than most other Laminated Softwood products. It is edge glued to give the board more stability with less cupping and warping. This... See Full Description

The pattern calls for 1/2" thick boards for the manger. Home Depot sells laminated spruce boards that work great for this project. The boards are 1" X 16" X 48". The actual thickness is .6 inches thick. They are cheap at \$12.82 per board. This is what I used. You can also just glue up your own panels if you have that available.

If you want to light the manger you need a lighting kit that fits a 1" hole. These are available at any good craft or hardware store.

The next few pages show the completed piece of each pattern
You can study these pictures if you need an assembly guide.

The project is cut mostly from 1/4" Thick wood.
The camel body is 1/2" thick.

Palm Tree part 1
1/4" Thick

Palm Tree Part 2
1/4" Thick

Palm Tree Base
1/4" Thick

The roof are 1/8" X 1.5" X 8" strips. I ripped a construction grade 2 X 4 in 1/8" thick strips and cross cut them 8 inches long. You need 10 strips. You could probably use 1/4" Thick strips if that's what you have available.

You could also cover with 1/4" thick solid panels for easier assembly

I glued and nailed the strips with small brad nails.

The base is optional. It is 22" X 16". I used the same spruce laminated panel I made the manger from to cut the base.
