General Pattern Information

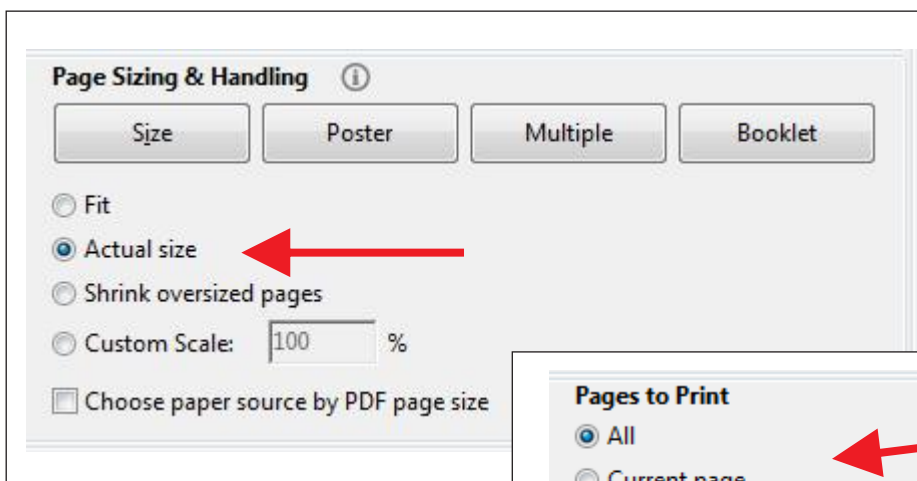

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

3 Spray can holder. This can be mounted on a work table or the wall. I put it on my small assembly table. I placed it so I could take the photo. I will move it to the back of the table so it is out of the way.

Supports added for more strength.

The braces are needed to give the bottom shelf some strength. I only used 1/4" thick plywood so it needed more support.

I used some cheap plywood. The pattern is designed for 1/4" thick plywood. As you can see my cheap scrap was not that thick. I always check the thickness against the pattern before I cut. I simply cut inside the pattern line to get a snug fit.
