# General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at [steve@stevedgood.com](mailto:steve@stevedgood.com)

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the “Page Sizing & Handling” section. Make sure the “Actual Size” is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the “Pages to Print” section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

▶ More Options

Do you have orphaned scroll saw blades that you would like to identify the size. I have seen people with dozens of mismatched blades in jars. This is not a perfect solution but I think it will at least get to close.

On the next two pages are size charts. Make sure you print the page at actual size. Don't allow your printer driver to use the print to fit option.

These charts are approximate sizes because different brands have different sizes. Different style of blades may be different widths with the same size #.

Measuring the width of the blade. Not the thickness.

All Blade Sizes

Standard size scroll saw blade chart with the actual blades next to the size. I did not have a #12 blade.

With careful inspection you can see the difference between a #5 and #7 blade but they are close.

The difference between a #9 and a #5 is obvious when compared to the chart.
