You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

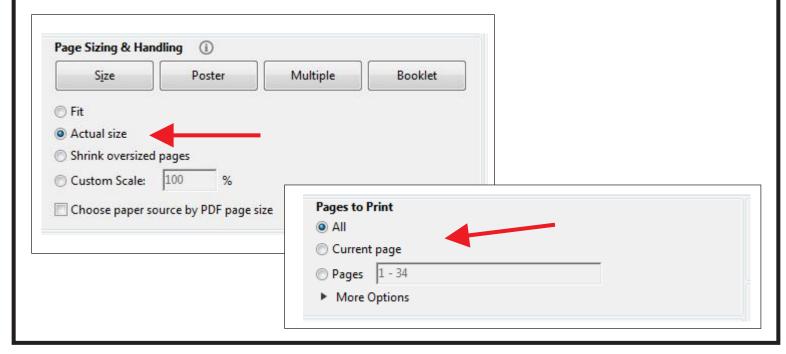

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the "Page Sizing & Handling" section. Make sure the "Actual Size" is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the "Pages to Print" section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

Printing Instructions

The original pattern idea was submitted by Tom Yocom

My two cents key fob. The two pennies are trapped inside the key fob and roll back and forth.

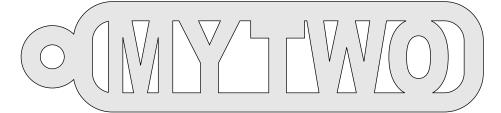

Sand the middle section until it is just thicker than a penny. If you don't, the pennies will get on top of each other and get stuck.

When you glue the key fob together make sure you check the orientation of the words. You want to read them correctly when you flip the fob over.

When you glue the pieces together make sure you have the words orientated so they are both right side up when the keyfob is flipped over. Once you have the front glued to the middle then insert the two pennies. Not you can glue on the back. Make sure the pennies slide smoothly and cannot get on top of each other.

1/8" Thick

Sand this center section thinner. You want it just proud of the thickness of a penny.
