General Pattern Information

You may use this pattern to make as many of the project as you like. You are free to use any technique including mass production to build the project. The pattern may be copied and given to others provided the entire book is kept intact. You may not sell the pattern or include it in another commercial package of any type.

Steve Good retains the right to the pattern. If you have any questions about the use of this pattern please contact me at steve@stevedgood.com

When printing this pattern it is important to print it full size. When you bring up the print dialog box look in the "Page Sizing & Handling" section. Make sure the "Actual Size" is selected before you hit print.

You also only need to print the page/s you need. After the print dialog opens look for the "Pages to Print" section. You can print the current page or a range of pages. This will help save ink by not printing the title/instruction pages.

I included a pattern for the wheels but here is a link to download
and 3d Printer file for the wheels.

<https://www.stevedgood.com/wheelfour.stl>

I used two 7.5" long 2x4s.
I cut the rounded edge off of one of them. Then
I cut two strips that are a little over 1/4" thick. These
strips are for the fenders.

I applied the car body to the remaining 2x4.

I am stack cutting the two fenders.

I used a #5 scroll reverse blade to cut the body and the fenders.

If you do not want the 3D printed wheels then you can use this pattern.
